

Key Micro*Storms/FOI Transition Actions and Dates

1) Freeze Micro*Storms (M*S) and Forest Operation Inventory (FOI). February 27

Data edit in the old M*S application and FOI transactions in Librarian will stop. Data will not be available for edit until after the transition is completed. Use of the data for query purposes will continue.

2) M*S Data Sent to Chris Cadwell February 27

The District Inventory Specialists will send the District M*S SITE files to Chris Cadwell.

3) Districts to Review M*S Error Reports March 15-17

Error reports from transferring the data to the new database will be provided to the District inventory for a “fatal flaw” review to determine if unexpected translation problems occurred.

4) New Micro*Storms Available for Installation March 18

Districts will be provided the new database and application for installation and use in the district. Edit features will not be activated until the M*S training has occurred.

5) Micro*Storms Training – M*S Edit Resumes March 29 – April 20

A two day course will be provided for the district core users of M*S at each district. Medford 3/29-31, Coos Bay 4/5-7, Roseburg 4/8-9, Salem 4/12-13, and Eugene 4/19-20. K-Falls is to be trained with one of the other districts. Edit features will be opened up on the new application after training is completed.

6) Implement New Attribute Structure in FOI / SDE March 29

With the M*S Transition the attribute structure for FOI / SDE will now contain all attributes from M*S. The old attribute structure will continue to exist in FOI / Librarian in the frozen state until it is decided we can retire it.

7) SDE Training – FOI Edit Resumes March 2-April 1

SDE edit training will be provided to each district. Salem & Roseburg 3/2-4, Medford 3/9-11, Eugene & Coos Bay 3/30-4/1. Edit can resume in FOI / SDE after both M*S and SDE training have been completed.
